

**Computer Science and Engineering**  
**Programme Outcomes (PO)**

1. Graduates will know the knowledge of mathematics, science and engineering.
2. Graduates will be able to design and conduct experiments as well as to analyze and interpret data.
3. Graduates will apply process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health, and safety, manufacturability and sustainability.
4. Graduates will be able to function on multidisciplinary teams.
5. Graduates will be able to identify, formulate and solve engineering problems.
6. Graduates will be able to understand professional & ethical responsibility.
7. Graduates will be able to communicate effectively.
8. Graduates will demonstrate the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context.
9. Graduates able to reorganize the need and ability to engage in lifelong learning.
10. Graduates will apply knowledge on contemporary issues.
11. Graduates will be able to use techniques, skills and modern engineering tools necessary for engineering practice.
12. Graduate will demonstrate an ability to participate and succeed in competitive examinations like GATE, GRE.
