

Departments of Textile Engineering

List of Program Outcomes (PO's)

After successful completion of program by students he/she will have

PO 1	Ability to understand the various process involved in textile manufacturing.
PO 2	Ability to apply knowledge of mathematics, science and Engineering Concept.
PO 3	Ability to handle operating textile and clothing technologies in their concern work domain.
PO 4	Ability to design & conduct experiments as well as to analyses and interpret data in textile engineering fields.
PO 5	Ability to identify, analysis, & solve textile engineering & technology related problems.
PO 6	Ability to design and develop logics, components, products, processes, with in boundary constraints as a changing needs.
PO 7	Undertake research in multidisciplinary areas.
PO 8	Understanding of their professional duties with ethics.
PO 9	Ability to communicate effectively both in verbal and nonverbal forms.
PO 10	Understanding and critical thinking regarding impact of textile sector issues in local and global economy and eventually on society
PO 11	Vision regarding the essentiality of lifelong learning in view to abreast with developments in the field of engineering and technology.
PO 12	Able to learn and use modern technology, computational skills and latest engineering tools necessary for textile engineering processes.
