

Computer Science & Engineering

Projects

Session :2016-17

Sr. No	Department	Project Title	Abstract	Thrust Area	Project Guide
1	Dept. of Computer Science and Engg.	Alternative mobile App for AICTE providing information on activities	AICTE consist of lot of information on approved institution , different scheme of the government, rules and regulation etc, related engineering and technology, management ,arts and crafts by using latest innovate ideas mobile app.	Android Application	Prof.J.H. Saturwar
2		Mechanism to help rural people to self select for receiving benefits of under Gov. scheme	Web Application for displaying the govt. sanction schemes for rural area for their benefits.	Android Application	
3		Naam foundation(A Organization Website)	This application stores the attendance in mobile internal database and the faculty can view and update the attendance whenever required. At the end of month faculty is needed to upload the attendance .	Web Services	Dr.D.N. Chaudhari

4		Designing of Digital Shipping System	Transport demand in most indian cities has increased due to increase in population as a result of both natural increase and migration from rural areas and smaller towns fast growth of Indias population .As the main objective of this system is to provide list of merchants who are ready to provide service of transportation to customers.	Web Services	
5		Online Canteen Management System	System for managing canteen records, bill, payments,stocks etc.	Database Management System	
6		Online Housing society maintenance	This cooperative Society management system will computerize all day to day operation in the society.This Project is developed to manage day to day activities of any cooperative housing society.	Web Services	Prof.A.P. Jadhao
7		E-Shopping Mall with bargaining System	Online shopping or E-shopping is a form of electronic commerce where the buyer is directly online to the sellers computer usually	Web Services	Prof.S.M. Inzalkar

			via the internet there is no intermediary service. The project aims to make an online shopping store.		
8		Student education alert system	Student Assessment Alert System provides a simple interface for maintenance of student information. It is made for educational institutes to maintain the records of student easily.	Database Management System	
9		E-Farming	Farming is the Prime Occupation in India in spite of this, today the people involved in farming belongs to the lower class and is in deep poverty. With E-Farming website will serve as a way for farmers to sell their products.	Web Services	Prof.A.R. Wasukar
10		Tracking of individual package booked in parcel luggage	Application for tracking parcel (packages) booked or purchased by customer.	Web Services	
11		Software tool for evaluating performance of teachers by students	Teaching Performance evaluation is an integral part of the teaching experience and plays a significant role in improving the teaching effectiveness. The current	Web Services	Prof.A.B. Kathole

			system for teaching evaluation for faculty review.Using this technology feedback can be taken in online system as compare to existing paper feedback system.		
12		Work for Workers	Workers are housed by their employers in cases where, either the number or the type of workers required cannot be sourced from or accommodated within local communities. This note is aimed at providing practical guidance to specialists, consultants and clients on appropriate policies and standards relating to workers status accommodations.	Database Management System	
13		I-Woman Security App	Now days, women security and safety are the main issues and the challenge to reduce violence against them is needed day by day.this application is also helpful for older people,senior citizens and children to	Android App	Prof.P.P. Lokulwar

			generate an emergency alert to police station.		
14		Nursery Managements	The plant nursery is place where plants were been seeded & grown as well as sale to customers. Customers buy this plants for decorate their home and offices.As everything is going to be on Internet maximum customer attention 7 marketing of nursery through internet.	Database Management System	
15		Interior Home decoration Management system	Interior decoration system is the art and science of enhancing the interiors, sometimes including the exterior, of a space or building , to achieve a healthier and more pleasing environment for the end user.	Database Management System	Prof.C.S. Dhamande
16		Online submission of telephone & Paper bills	Web Application for submitting data (telephone bills, paper bills, etc.) to the service provider.	Web Services	
17		Student Data Administrator	A student data administrator system , school administration software or student	Database Management System	Prof.V.R. Shelake

			administration system is a management information system for education establishments to manage student data.		
18		Online Paper Valuation data carrier System	Application for valuation of exam papers for the valuation centre, and printing records.	Web Services	
19		Online Car rental system	With web based car rental management information system we could improve the time efficiency of rental history data transmission after using this application.	Web Services	
20		E-Grampanchayat	E- Governance is system which not only helps government servants by reducing their unnecessary workload but also helps to the other people those who seeking the services of government.	Web Services	Prof.A.P. Bakshi
21		Online Advertising system	The online advertising is a form of promotion that uses the internet and world wide web for expressing the purpose of delivering market messages to attract	Web Services	Prof.A.R. Manakshe

			customers. It is convenient for the person that includes customer.		
22		Manage my Event(Mangalam Management)	Celebrate special events in a lavish and enchanting style mesmerize your guests by the stunning venue choice of yours.It is a online platform through which appropriate venue is selected.	Database Management System	
23		Farming assistance web service	Agriculture is known as back bone of India. As there is an immense need off setting this communication gap between the farmer and experts in agriculture.	Web Services	
24		Lab Manual android app	Mobile applications can be one of the best ways to keep consumers engaged with the brand as they are on the move.It is application where user can get whole information about lab timetables.	Android Application	Prof.P.A.Patil
25		Application For Ministry of AYUSH	Today's medical science gives us quick relief but not the guarantee of health.AYUSH is an acronym for	Database Management System	Prof.S.P. Deulkar

			Ayurveda,yoga and naturopathy,unani,siddha & Sowa Rigpa and homeopathy.		
26		Books and Study Analysis	To monitoring various books and study materials for the user.	Database Management System	
27		Location Based Alert System	The main objective of the project is to develop a GPS based application to alert the users through an alarm when the user reaches near a preset location.To retrieve the users current location coordinates,to allow users to set their target location and save that target to the list.	Web Services	Prof.A.N.Kazi
28		Local level Natural Resource Mapping & management for sustainable Development	An ever increasing population associated with various other factors has put tremendous pressure on the environment and its respective resources.	Database Management System	
29		Conference room Booking system across multiple ministry dept in different Building	This is web application which is implied for booking multiple ministry dept. to allocate and book rooms for conference.	Web Services	Prof.M.K.Popat

30		Improving the existing employment framework/ mechanism for skilled People	Improving the existing employment framework/mechanism for skilled people is an online employment framework for qualified as well as for skilled people to communicate with company.	Web Services	
----	--	---	---	--------------	--

Session :2015-16

Sr. No	Department	Project Title	Abstract	Photo	Thrust Area	Project Guide
1	Dept. of Computer Science and Engg.	Cloud Based Digital Locker	Helps to connect with govt offices and shares information on issues and concerns faced. Provide a secure dedicated personal electronic space for storing documents of resident Indian citizens.		Cloud Computing	J. H. Saturwar
2		Share it As A Web Based Application	The primary goal of this site is to donate goods online. It facilitates online sharing of accessories.		Web Services	
3		Design And Implementation of Effective College Selection	Provide list of colleges to which student can take admission. With this they are getting facility to fill the preference form with		Database Management System	D. N. Chaudhari

			a more surety.			
4		Smart City	Creating an innovative network between govt. and academic that is leading to excellence in the development and e services and e govt.		Web Services	
5		Online Blood Donation Management System	Create an E information about the donor and blood bank that are related to donating the blood. Registering donor, and whole information about blood available, and requests for blood.		Web Services	A.P. Jadhao
6		Online Vehicle Showroom	A online showroom where customer can directly view the vehicle, their specification, vehicle service forms. Book test drive. Web based interface for customers.		Web Services	
7		Heterogeneous Grid Computing	When we try to transfer file, it is just crashed and cannot transfer to at receiver. So such problems must be overcome by monitoring the transmission of files any by perfectly sending the crashed file at the		Grid Computing	S.M.Inzalkar

			particular location.			
8		Online Job Portal	Connect to the industries and acts as an online recruitment to support the students to find the IT job.		Web Services	
9		Complaint Management System	Provides an online way of solving the problems faced by the public by saving time and eradicate corruption. Easier to coordinate, monitor, track and resolve and monitor complaints.		Web Services	M.K.Popat
10		Online Students Management System	Provides a simple interface for maintenance of student's information		Database Management System	
11		Digital Library	System for managing and monitoring E books. Maintaining records of books.		Database Management System	
12		Online CurriCular Makeup Management	Web application for managing student makeup in the college and institute.		Web Services	P. A. Patil
13		Automatic Time Table Generator	System will take different i/p like no. of subjects, teachers, no.of lectures required, topics covered and generate time table.		Database Management System	

14		Attendance Management System	A software application developed for daily student attendance in school, colleges and institutes.		Database Management System	
15		Online Feedback System	Software collects feedbacks from students, and calculating feedback		Web Services	A.R. Wasukar
16		Online Voting System	Software allows online voting. It also creates and manages voting and an election detail.		Web Services	
17		Online Auction For Custom Product	Automate the bidding process.		Web Services	P. P. Lokulwar
18		Online Admission Form	Software for college is web based software particularly design for fill up the admission form online except offline. It provides platform that connects all department students of institution.		Database Management System	
19		City manager	Platform to city to be showcased for all it has in terms of unique business, places to see, things to do, use local transport for a new traveler.		Web Services	
20		Cloud Based Information Sharing Portal With Enhanced Security	A technique that overcomes the drawbacks of both textual and graphical password is		Cloud Computing	A.B. Kathole

			emoji-picture password.			
21		Personolise Mobile Search Engine	Captures the user's preferences in the form of concepts y mining their click through data		Android Application	S. P. Deulkar
22		Network Based Virtual Drawing	Consist of drawing board using which the user located at various location are allowed to work on common drawing.		Web Services	
23		E- Learnig	Provides online learning methods. Conducting online lectures. Maintaining attendance.		Web Services	
24		E-Property buy and sell	Solution to cover all aspects of Estate Agent activity and property buying and selling procedure for organization. Maintaining client details, property permit, its price, documents.		Web Services	C. S. Dhamande
25		Lab Monitering System	System is used to build up and improve the management system for computer labs. Maintaining records, monitoring the system. Storing students data.		Database Management System	V. R. Shelke

26		Android Based Transportation System	Provide accurate information various charges, route information, and other required details anywhere and anytime.		Android Application	
27		Asset Management System	Software to maintaining and monitoring stock records, counting stocks, allocate items & maintain inventory.		Database Management System	A.N.Kazi
28		Development of College Info Android App Based Online Design Tool	Android application that helps the user to know about our college and campus. Chatting facility. Information about the college and campus.		Android Application	S. G. Gupta
29		To Build Cost Efficient Cloud Server using Raspberry Pi	Aims at building a cost efficient cloud server, that can be used both for personal and commercial work. Based on raspberry PI.		Cloud Computing	
30		E- Tendering System	System will enable the suppliers to get all the tender details online and provide facility to bid on particular tender		Web Services	A.R.Manaks he
31		E-RTO Management System	System which helps in work related of RTO office online. Provide registration for driving license, issuing		Web Services	

			appointment date etc.			
--	--	--	-----------------------	--	--	--

Session :2014-15

Sr. No	Department	Project Title	Abstract	Photo	Thrust Area	Project Guide
1	Dept. of Computer Science and Engg.	Opinion Mining: Web Feedback System	The goal of this project is to extracting, classifying, understanding and accessing the opinions expressed in various online news sources.		Web Services	Prof. J. H. Saturwar
2		Campus Recruitment System	This project provide with recruitment of students in companies in campus		Database Management System	
3		Confidentiality of Data providing access to data using successful Authentication	This project is used to protect important data using cryptography.		Data Mining	Prof. D. N. Chaudhari
4		Fast Fourier Transform And Its Implementation	Fast Fourier Transform And Its Implementation is use for Digital Signal Processing		Digital Signal Processing	
5		Find My Tutor	It will solve problems of student by knowing students requirement.		Database Management System	Prof. A. P. Jadhao
6		Implementation Of DSDV Routing Protocol & Security Against DOS Attack In VANET	Aim of this project is to give drivers more comfortable & more secure driving		Vehicular Adhoc Network	

			experience.			
7		Advancing In Agriculture Technology	This project gives the detail information about various schemes related to this agriculture website.		Web Services	Prof. S.M. Inzalkar
8		Online Crop Insurance Management System	This project related to crop insurance management for farmers.		Database Management System	
9		Android App for JDIET	This app is used on mobile by student to check attendance & grade in each subject.		Android Application	Prof. S. A. Thakare
10		Corporate Recruitment System	Aim is to develop mediator between employees & organization.		Web Services	
11		Academic Venture Supervision System	This system is used for supervision of academics of students.		Web Services	Prof. A. R. Wasukar
12		Job Portal With Online Examination	This project provides with different online job portals for searching jobs.		Web Services	
13		Application Package For Tuflos	This project will reduce load taken by blind to remember & type characters using keyboard.		Web Services	Prof. P. M. Lokhande

14		System to Automate University Admissions	This project provide with automatic process of admission		DBMS	
15		Online Student Feedback System (Module - II)	The hectic manual feedback has been upgraded by online feedback for students .		DBMS	
16		EMS an Android App for Emergency Patients	Aim of this application is to study what variables can be used as reference by emergency medical services.		Android App	Prof.C.S. Dhamande
17		Apartment Management	This project provide with management of apartment for people.		Database Management System	Prof.P.P.Lokulwar
18		Crime Record Management	This project related to maintain crime record of criminals.		Database Management System	
19		Advanced E-learning	This project provide with advanced e learning resources.		Web Services	
20		Indoor GPS	This project proposes a mobile application which will be able to estimate position of user within a building by using wifi technology.		Android Application	Prof. C. S. Deshmukh
21		Automatic java code generation	This project is done using java to generate java code by inputting user required form design.		Web Services	Prof. R. S. Sawant

22		Online Notice Board.	This project provide all notices online accessible from anywhere.		Web Services	
23		Soft Computing Technique For Categorization Of Unstructured Web Data	This project contains variety of web documents from different domains.		Data Mining	Prof.P. A. Patil
24		Content Management System	This project can change websites web pages according to user requirement.		Web Services	
25		Hybrid Expert System For Diagnosis And Symptoms Of Disease	This project gives expert advice on diagnosis for neurological disorder.		Web Services	Prof. P. H. Jadhao
26		Result Analysis System	This project provide user with analysis of result of student.		Database Management System	
27		E- Census	Improvement in information technology have provided unimaginable opportunity to support census data analysis.I		Web Services	Prof. A. B. Kathole
28		Online Tutorial	This project provide students with online tutorails.		Web Services	
29		Musical Visual Interface Via Emotion Detection Supervisor	The motivation behind this project is lack of context-aware music recommendation system ,where automatically		Artificial Intelligence	Prof. V. R. Shelke

			detected users mood.			
30		Teacher Guardian Management System	This project provide with management of guardians to students.		Database Management System	
31		An Efficient Approach For Template Extraction	Aim of this project is template extraction.		Web Services	Prof. A. N. Kazi
32		Blood Bank Management using Android	This project is used to manage blood of different blood group using app.		Database Management System	

Session :2013-14

Sr. No	Department	Project Title	Abstract	Photo	Thrust Area	Project Guide
1	Dept. of Computer Science and Engg.	Uni-Campus MIS(Management Information System)	Uni-Campus Management System allows us to manage the campus digitally in-house activity.		Database Management System	Prof.J.H. Saturwar
2		360 degree Feedback System	360 is highly effective as a development tool.the feedback process gives people an opportunity to provide anonymous feedback.Feedback recipients gain insight into how others perceive them and have an opportunity to adjust the behaviours and develop skill.		Database Management System	

3		E-Healthcare Advisor	For consumer, dealing with the health care system today can be difficult and frustrating experience the process is daunting from outside. Who to call? Where to go? How much to pay? When someone's health is at stake these questions should be answered by objective resources that can help better health care System		Database Management System	Prof.D.N. Chaudhari
4		Indian Wildlife	India is home to many national parks and within these is a fantastic array of wild life, much of it is unique people can travel luxuriant Humid Jungle and watch the animals and many more in wilderness.		Web Services	
5		Tracker and targetter: Detection of lost mobile on Android Platform	This project particularly handles to create the application for android mobile phone to find a lost mobile. Once we installed our application in the mobile, it gives the SIM information about the user who is using the mobile.		Android App	Prof.A.P.J adhao
6		Personalized Mobile Search Engine	Personalized Mobile Search Engine helps to search the data within the mobile.		Android App	

7		Online Company Outlet for Philip	The google online marketing challenge is an on going collaboration between google and academics , to give students experimental learning. The challenge gives student US \$ 200 in Ad words, google flag ship advertising product, to develop online marketing campens for actual businesses.		Web Services	Prof.S.M. Inzalkar
8		Online village Development and Monitoring System	Village development and monitoring system is a web application.Issues like primary education, peoples health,government policies awareness and availability of basic facility are on main focus among others.		Database Management System	
9		Association Rule Mining using Apriority Algorithm for Online Books store	Association rule mining one of the most important and well researched techniques of data mining was first introduced. It aims to extract interesting correlations, frequentpatterns, associations or casual structures among sets of items in the databases.		Big Data/DBMS	Prof.A.B. Kathole
10		Scenario Base Analysis of AODV and Dsr Protocols under	In recent Years mobile computing and wireless		Network Management	

		Mobility in Wireless Sensor Networks	network have enjoyed tremendous rise in popularity and technology advisement.		System	
11		CAPTCHA PROVIDER	CAPTCHA PROVIDER is use to provide and enhance the security		Web Security	
12		Student Epayment System	We consider the problem of building online fees payment system which enables to the students to pay their college online by the way using credit cards.		Web Services	Prof.S.A. Thakare
13		Web Based Application for food Distribution and Monotoring System	The public Distribution System plays an important role in the provision of food security.PDS in the country facilitates the supply of food grains to the poor at a subsidized price.		Web Services	Prof.M.K. Papat
14		A Neighbor Coverage-Based Probabilistic Rebroadcast for Reducing Routing Overhead in Mobile Ad-Hoc Network	Due to high mobility of nodes in mobile ad hoc networks(MANETs),there exists frequent link breakages which lead to frequent path failures and route discoveries.		Mobile Adhoc Network	Prof.S.G. Gupta
15		Email Indexing Server with Thin Android Client using Phone Gap	The design and implementation of new system to manage email msgs using email involving clustering is the main function of project.		Android App	Prof.P.M. Lokhande

16		Dependable Storage for VIMS Thruption in Private Cloud Secured Encryption	Cloud Storage enables users to remotely store their data and enjoy the ondemand high quality cloud applications without burden of local hardware and software management.		Cloud Computing	Prof.A.D. Patil
17		Secure and Practical Outsourcing of Linear Programming in Cloud Computing	Cloud computing has great potential of providing robust computational power to the society at reduced cost.		Cloud Computing	
18		Online Library System	This project aimed at designing an online library management system .this is an intra net based application that can be access through the campus.		Database Management System	Prof.C.S. Dhamande
19		ADVIC- Educational System for Teaching Database Courses	This project presents a web based education system, ADVICE that helps student to bridge the gap between database management system (DBMS) theory and practice. The usage of advice is presented through a set of lab developed to teach students conventional and logical modelling SQL, formal Query Lang. and Normalization		Database Management System	
20		Cloud Based Distribution of Auto work system	This project aims to distribute the task and		Cloud Computing	Prof.V.R. Shelake

			controlling on various administrators including the task under administrator i.e. work for higher authority i.e. time duration, providing related other activities.			
21		Design and implementation of DSR protocol to secure mobile ad hoc network	MANET are the special types of wireless network where mobile nodes or terminals are connected through wireless interfaces forming a temporary network without any free infrastructure.		Network Management System	
22		Preventing Routing attack of MaNET using Dempster-Shafer Theory	MANET have been highly vulnerable to attacks due to the dynamic nature of its infrastructure. Among these attack routing attack have received considerable attention since it could cause the divastating damaged to MANET.		Mobile Adhoc Network	Prof.P.A.P atil
23		Trouble Recognition model for Reliable cloud computing	Cloud computing is an emerging technology that grants user with direct yet shared access to remote computing resources and services.		Cloud Computing	
24		Implementation of E-Attendance Using Face Recognition Technique	Authentication is a significant issue in system control in computer based communication. Human		Image Processing	Prof.R.S. Sawant

			face recognition is an important branch of biometric verification and has been widely used in much application.			
25		Authentication provided by integrating sound signature and CCP	Computer security depends largely on passwords to authenticate human users. Authentication is the first line of defense against compromising confidentiality and integrity.		Network Security	
26		Android Based Secured Photo Identification System Using Digital Watermarking	With the development of information technique the power of image processing software become stronger and it can easily edit the digital images more easily.		Android APP	
27		Live Window Controller	The world today is full of networks using cell phones or computers. This great feature allows connecting one computer to others. This is the networking based project that allows one computer to control one or more computers.		Network Management System	Prof.N.V. Paradakhe

Session: 2012-13

Sr. No	Department	Project Title	Abstract	Photo	Thrust Area	Project Guide
1	Dept. of Computer Science and Engg.	Steganography	Steganography is a process that involves hiding a message in appropriate carrier.		Network Security	Prof.J.H.Saturwar
2		Professional Learning System in Education : E-Learning	This project is designed in the base of increasing the learners interaction with expert.		Artificial intelligence	
3		Implementation of Anti Hacking tool for Cloud data Mobile Alert	Cloud computing has been envisioned as the next generation architecture of IT enterprise.		Cloud computing	DR.D.N.Chaudhari
4		Online Secure Mobile Based Voting System	Online mobile voting using internet via electronic equipment like mobile, personal computer, PDA etc. in today's context is behind its time in respect of usage of modern ICT.		Android App	
5		Congestion Control for VANET in Artificial Neural Network	Recently, Vehicular ad hoc network (VANET) can offer various services and benefits to VANET users and thus deserves deployment effort.		Artificial Intelligence	
6		Implementation of AODV Routing Protocol And Security against Routing Attacks in VANET	VANET is a new communication paradigm that enables the communication between vehicles on the road network.		Network Security	Prof.A.P.Jadhao
7		Ensuring Distributed Accountability for Data Sharing in Cloud	Cloud computing enables highly scalable services to be easily consumed over the internet on as		Cloud computing	Prof.S.M.Inzalkar

			needed basis.			
8		E-Campus Management System	E-Campus Management System allows us to manage the campus digitally in-house activity.		Web Seviles	
9		Security System for DNS using Cryptography	The mapping or binding of IP addresses to host names became a major problem in rapidly growing internet.		Network Security	
10		Network with Android A Library Reservation	In the college students usually use the library facility to issue their desired books. But they required a large amount of time to issue that particular book,because firstly they have to visit the library.		Android App	Prof.A.A.Bhosale
11		Multi Database Enterprise Manager	This tool can be used to browse any database such as Oracle, SQL Server, Access etc. So user does not have to use different tools for different databases.		Database Managemet System	Prof.C.S. Dhamande
12		Error Control System in Network Environment	A channel allocation algorithm in a cellular network consists of two parts: a channel acquisition algorithm and a channel selection algorithm.		Network Security	
13		Monitoring the traffic Attacks on Vehicular Ad hoc Network	Vehicular ad-hoc networking is an emerging technology for future on the road communications.		Network Security	Prof.A.B.Kathole
14		DB Crypto: A Database Encryption System using	Vehicular communications play a substantial role in providing		Network Security	

		Query Level Approach	safety transportation by means of safety message exchange.			
15		Hybrid Compression Encryption Technique for Securing SMS	Mobile communication devices have become popular tools for gathering and disseminating information and data.		Network Security	Prof.P.M.Lokhande
16		Data Storage Security in Cloud Computing	Cloud computing has been envisioned as the next generation architecture of IT enterprise.		Cloud computing	
17		Page Replacement for Database Query Catching	On deployment of DB Cache at an application server, arbitrary SQL Statements generated from the unchanged application that are intended for a backend database server.		Database Management System	Prof.V.R.Shelake
18		Cloud-e Networks	Cloud e network is type of E learning comprises all forms of electronically supported learning and teaching.		Cloud computing	
19		Web Based Diagnosis System	The wealth of medical information on the web makes it convenient for non-experts to conduct their own diagnosis and healthcare assessment based on limited knowledge.		Web Services	Prof.P.A.Patil
20		DECENT GALLERY(ONLINE PHOTO SHARING)	Purpose of a project is to provide an environment for sharing photos bundled in the form of gallery with your loved ones or with the rest of the world.		Web Services	
21		Mobile Travel Guide - A Smart Way to Travel	Mobile Travel Guide will help the user to determine the path by		Android App	Prof.P.P. Lokulwar

			consider the factors to find out the distance ,time ,etc.			
22		Attendance System in Class Using Android mobiles	We have seen over the years that the process of manual attendance has been carried out across almost all educational institutions.		Database Management System	
23		IT WORLD JOB PORTAL IN ANDROID	This IT WORLD JOB PORTAL is use for the various type of placement in IT Sector.		Android App	
24		Android Phone Data Back Up Using Cloud Computing	Cloud computing is a promising technology which is transforming the traditional internet computing paradigm and IT industry.		Cloud Computing	Prof.A.D.Patil
25		METASEARCH ENGINE WEB	As a World Wide Web based internet services become more popular information overload also becomes a pressing research problem.		Web Services	Prof.S.A.Thakare
26		Online Modeling of Proactive Moderating System for Auction Fraud Detection	We consider the problem of building online machine learned models for detecting auction frauds in e commerce web sites.		Web Services	
27		The Design And Implantation of the WI-MAX Module for NS2 Simulator	In modern world wireless communication systems are involved in every part of life. WiMAX is the upcoming wireless system which uses IEEE standard 802.16.		Network Management System	Prof.D.S.Kute
28		Flexible Rollback Recovery in Dynamic	Large application executing on grid or cluster architectures		Grid Computing	

		Heterogeneous Grid Computing	consisting of hundreds or thousands of computational nodes create problems with respect to reliability.			
--	--	------------------------------	---	--	--	--
